Welcome to the ESC advanced training course

This advanced training course offers an opportunity to innovate knowledge of modern contraceptive methods and enable clinical consultation on contraception, including difficult and complex patients. It uses the ESC training improvement programme and related tool that is complementary to the WHO teaching course (www.fptraining.org). More details about the content of this advanced training tool can be found on the website of ESC <https://escrh.eu/education/training-improvement-programme/>
